Full-Stack Developer specializing in React.js, Node.js, Express.js, and MySQL, with experience developing REST APIs, database-driven applications, authentication systems, and role-based access workflows.

EXPERIENCE

Red Hawk Consultancy

Full Stack Intern, EdaOS ERP

Mar 2026 – Present

Remote

- Architected a multi-school ERP using React, Node.js, Express.js, MySQL, REST APIs and JWT Authentication.
- Designed 55+ REST APIs and 15+ backend modules supporting attendance, timetable, assignments, examinations, fee management, and administrative operations for 5 user roles across 25+ database entities.
- Acted as the technical lead for a team of 2 developers and 2 UI/UX designers, defining system architecture, guiding implementation decisions, and ensuring alignment between product requirements and technical execution.
- Transformed 14+ static React.js pages into interactive frontend modules and integrated 20+ API-driven data flows for student and teacher portals, including dashboards, attendance, notices, assignments, and academic records.

Bidnow

React Native Developer Intern

Aug 2025 – Feb 2026

Remote

- Reduced Android app crashes by diagnosing and fixing 10+ recurring crash scenarios across multiple screens.
- Led a UI revamp across 6+ screens, rebuilding them into 12+ reusable React Native components with Redux-based state management and REST APIs.
- Delivered 5+ production features independently for a live application with 1,000+ downloads, and UI consistency.

PROJECTS

flatMATE

Next.js, Node.js, Express, Prisma, NeonDB, OAuth, Maps API

Nov 2025 – Dec 2025

Full-Stack Web Application

- * Developed a full-stack platform with 3 user roles and 5+ workflows that helps college students discover flats and connect with potential flatmates.
- * Developed 10+ reusable frontend components and map-based listing views using Next.js.
- * Engineered backend services for listings, requests, role-based access, and admin moderation using Prisma and NeonDB.

Valid8

Next.js, Node.js, Server-side Content Extraction, LLMs

Sep 2025 – Oct 2025

AI Research Tool

- * Created an AI-powered tool that converts news URLs into explainable research pages with credibility analysis and summaries.
- * Implemented a server-side content extraction pipeline that removes 90%+ of non-essential webpage content.
- * Implemented a 3-stage AI workflow for extraction, reasoning, and presentation with claim-level credibility analysis.

Chat Application

MongoDB, Express.js, React.js, Node.js, Socket.IO, Vercel
